## JPX4 Compact

The JPX4CP is a 4-shot high-performance OC pepper projector. It fires canisters filled with 0.35 oz of our most potent 400,000 SHU **Piexol** OC solution. The canisters can be individually replaced when discharged. The JPX4 is a break-barrel system. The trigger is double-action only rotating between the four barrels with each pull, allowing the discharge of four rounds in less than 4 seconds. Its two finger grip makes the JPX4CP a compact and lightweight high power defense tool. A window in each barrel indicates if a live or a training canister is loaded. Four canisters can be put together with a speed loader clip.
