Protecting your community starts with equipping yourself with body armor that not only meets the highest level of protection but also exceeds your expectations for lightweight comfort

and performance. At Point Blank, we're constantly pushing the limits beyond what you thought was possible in ballistic technology. We currently have more NIJ .06 certified products than any other ballistics company in the industry with a key emphasis of providing our customers with lighter, more flexible body armor systems with greater ballistic capabilities. More officers trust the Point Blank brand because when it comes to meeting your needs for life protecting technology, expectations can never be too high.

Inside our world-class PBEI **Technology and Testing Center,** a state-of-the-art ballistic laboratory allows us to continuously develop maximum-performance products which consistently exceed National Institute of Justice (NIJ), U.S. Military, Government (DEA and FBI) and International testing requirements. The Center also includes a dedicated R&D **Garment Design Department that** designs cutting-edge concealable and tactical carriers and a host of tactical accessories with the highest level of ergonomic fit and finish. This combination of ballistic expertise and garment design provides a seamless culmination of the most advanced body armor systems that are unparalleled in ballistic protection

At Point Blank, we strive to produce systems that combine maximum comfort and mobility with split -second adaptability. We are excited to offer you the

and comfort.

latest advancements in ballistic technology and more options according to your required threat level and specifications for weight and performance.

POINT BLANK | POINT BLANK | Hard Body Armor

HOW SOFT BODY ARMOR WORKS

PROTECTION AGAINST BALLISTIC THREATS

When a bullet or projectile strikes body armor, it is caught in a "web" of high performance fibers that are layered and stitched to exceed certain bullet resistant specifications. The engaged fibers absorb and disperse the impact energy that is transmitted to the vest from the bullet, causing the bullet to deform or "mushroom". Additional energy is absorbed by each successive layer of material in the vest., until such time as the bullet has been stopped. Because the fibers work together in both the individual layer and with other layers of material in the vest, a large area of the garment becomes involved in preventing the bullet from penetrating, as well as dissipating the forces which can cause non-penetrating injuries to internal organs.

POINT BLANK UTILIZES A BLEND OF HIGH STRENGTH FIBERS, WHICH ARE 6 TO 9 TIMES STRONGER THAN STEEL ON AN EQUAL WEIGHT BASIS

PROTECTION AGAINST BLUNT TRAUMA

.

Since soft body armor deforms backward upon impact, it also deforms backward into the wearer of the vest. The damage to tissue caused by this transfer of kinetic energy is called blunt trauma. Minimizing blunt trauma helps save lives, since it not only reduces internal injury, but prevents temporary incapacitation during the initial hit, allowing the wearer to respond immediately in a high-threat situation. In testing against a soft clay backstop, a 1.7" (44 mm) deformation is the maximum indication of blunt trauma allowed by the National Institute of Justice (NIJ). As illustrated, Point Blank holds itself to an internal standard that is more stringent than NIJ requirements.

According to research conducted by The Federal Bureau of Investigation (FBI), the risk of fatal injuries for officers who do not routinely wear body armor is 14 times greater than for those who do.

As a company dedicated to serving the law enforcement and corrections community, a startling statistic such as this is the driving force behind our primary commitment, to provide the safest, most comfortable body armor in the world. To date, the lives of over 3,000 law enforcement officers have been saved by the use of bullet-resistant body armor.

Officers trust Point Blank's line of concealable and tactical body armor because they know they don't have to compromise comfort for performance. As street threats increase in number and capacity, our experts in the Point Blank Technology and Testing Center are continuously testing and evaluating new advancements in ballistic technology to produce vests which not only offer superior protection but optimum comfort for daily wear. Point Blank is proud to stand at the

Point Blank is proud to stand at the forefront of this endeavor and will work diligently to communicate the importance of body armor, so that officers will stay protected.

HOW HARD BODY ARMOR WORKS

INSIDE HARD ARMOR PLATE

Ceramic plates are designed to stop rifle rounds and armor-piercing rounds which have a penetrating steel pin in the bullet. Plates are engineered by bonding a layer of ceramic to a hard panel made of multiple layers of ballistic material wrapped in a fabric covering.

As the bullet hits the plate, the hard ceramic strike face begins to break up the bullet while the ballistic material begins to absorb the energy of the penetration.

The round continues to break apart as the ballistic material extracts energy, decelerating the projectile and catching the fragments while limiting the effect of blunt trauma, the injury caused by an impacting bullet.

Hard body armor typically incorporates an ultra-hard, ballistic ceramic top layer combined with a laminated blend of unidirectionally oriented fiber bundles which

work together to stop bullets and fragments. Some ultra lightweight plates do not incorporate ceramics in their construction. These nonceramic designs are effective against Level III threats. Ceramic hard armor works by disrupting the aerodynamic shape of the bullet and dissipating the energy through the shattering of the ceramic top layer.

The blunted or shattered bullet

the ceramic fragments (secondary projectile) are caught in laminated blend of high performance fibers, thereby inhibiting penetration.

NIJ 0101.06 Standard Bullet Resistance

In the United States, body armor levels are certified by the National Institute of Justice (NIJ). The levels are IIA, II, IIIA, III, and IV. The body armor classes are often described by what sort of weaponry they guard against. The lowest level body armor can only be relied on to protect against bullets with relatively low energy, which tend to have less force on impact. Some higher level body armor can protect against higher energy bullets (i.e. 44 magnum and 357 magnum). Categories IIA through IIIA are soft and concealable. Type III and Type IV use hard or semi-rigid plates to defeat high energy rifle rounds.

Point Blank's Concealable Body Armor Systems are specially designed to defeat specific threats and to suit personal needs for comfort and fit. The Elite, Vision®, Hi-Lite, Python, Standard and Executive concealable carriers showcase leading-edge innovations which address critical factors such as the officer's work environment, type of duty assignment/ammunition, and geographic climate, among others. The end result of our uncompromising due diligence are vests that you can comfortably wear everyday, that are backed by Point Blank's unparalleled quality assurance standards.

MC Shape

POINT BLANK

The MC is a male concealable ballistic pattern which is designed to increase concealability with out sacrificing coverage or interfering with mobility. It utilizes Point Blank's proprietary Self Suspending Ballistic System.

comprehensive protective coverage while offering maximum maneuverability.

The MX4 is a female concealable ballistic pattern which is designed with a contoured shape to accommodate the female anatomy while providing optimal ballistic coverage and around-the-clock comfort. It utilizes Point Blank's proprietary Self Suspending Ballistic System.

The Python is a male concealable ballistic pattern which is designed to offer an alternative fit style for males as well as an alternative suspension system and shoulder adjustment.

Trilhouette Shape

The Trilhouette is a female concealable ballistic pattern which is designed to offer an alternative fit style for females as well as an alternative suspension system and shoulder adjustment.

Trufit Shape

The Trufit is a mid-chest ballistic pattern which is designed with more coverage on the sides of the chest to accommodate both males and females with athletic builds. It utilizes Point Blank's proprietary Self Suspending Ballistic System.

BODYARMORWVENT

The shape of your ballistic panel affects the comfort, fit and long term wearability of your body armor. Point Blank offers several different

Concealable Body Armor

options that allow you to select a shape according to your individual preference for coverage and comfort. Considered

the new bench mark for concealable body armor, the ergonomic design and shape of Point Blank's carriers emphasize

BODYARMORVENT™ improves the daily comfort and operational effectiveness of law enforcement professionals. Featuring EVAP[™] Technology, this highly effective system delivers continuous ventilation of body heat and accelerated evaporation of sweat, dropping body armor surface temperatures by as much as 23%. BODYARMORVENT™ comes standard in Elite concealable carriers.

BODYARMORVENT[™] is available as a Retrofit Kit consisting of:

- 2 BODYARMORVENT™ panels
- 1 Inflation bulb
- 1 Roll of adhesive hook tape

ELITE MALE

- Ergonomically designed for a tailored fit with minimum visibility
- Elite comes standard with BODYARMORVENT™ integrated into the carrier
- Self Suspending Ballistic System™ (SSBS) prevents rolling and sagging of ballistic panels inside the carrier
- Easy-access to ballistic suspension through peel-back shoulder design for easy adjustment
- Durable Water Repellent (DWR), microfiber outer shell
- Top Loading Combo Plate Pockets accommodate 5" x 8" trauma inserts as well as 6" x 8", 7" x 9" or 8" x 10" plates in front & back
- Four 2" x 12" elastic side straps offer 8 point adjustability
- Optional 4" x 12" side straps available
- Two shoulder straps
- Removable elastic cummerbund stabilizes vest and provides a secure fit
- Easy access ballistic panel removal with external YKK standard zipper on outer lower torso
- Low profile loop used for side strap attachment points
- Narrow front tail design provides a secure, less bulky fit (available with or without shirt tails)
- Available with ThorShield[™] sleeve electroshock weapon protection (optional)
- Elite concealable ballistic panels fit into Cross over Carriers
- Available in MC shape
- Available colors: Black, White, Navy & Tan

Concealable Body Armor

BODYARMOR≡VENT

BODYARMORVENT™ improves the daily comfort and operational effectiveness of law enforcement professionals.

Featuring EVAP™ Technology, this highly effective system delivers continuous ventilation of body heat and accelerated evaporation of sweat, dropping body armor surface temperatures by as much as 23%. See Page 13 For More Detail

Introducing the Revolutionary Elite **Body Armor System**

Elite concealable body armor system truly outperforms and over delivers in weight, thinness, flexibility and overall performance. Offered with virtually the lightest weight and highest performing NIJ .06 Level II and IIIA ballistic systems in the market today, the Elite vest provides exceptional comfort and protection, that is matched by none.

NIJ 0101.06 Ballistic Options

PointBlankEnterprises.com

Available with NIJ .06 Level IIA, II and IIIA Ballistic Systems

ELITE FEMALE

- Contoured shape forms around the female frame and bust area
- Elite comes standard with BODYARMORVENT™ integrated into the carrier
- Flexible design provides optimum maneuverability and comfort for daily wear
- Self Suspending Ballistic System[™] (SSBS) prevents rolling and sagging of ballistic panels inside the carrier
- Easy-access to ballistic suspension through peel-back shoulder design for easy doffing and donning
- Durable Water Repellent (DWR), microfiber outer shell
- BODYARMORVENT® with EVAP™ technology helps keep you cool and comfortable
- Top Loading Combo Plate Pockets accommo date 5" x 8" trauma inserts as well as 6" x 8". 7" x 9" or 8" x 10" plates in front & back
- Four 2"x8" elastic side straps offer 8 point ad justability: Optional 4"x 8" side straps available
- Two shoulder straps
- Removable elastic cummerbund stabilizes vest and provides a secure fit
- Easy access ballistic panel removal with external YKK standard zipper on outer lower torso
- Low profile loop used for side strap attachment points
- Narrow front tail design provides a secure, less bulky fit (available with or without shirt tails)
- ThorShield[™] sleeve electroshock weapon protection available (optional)
- Available in MX4 & Trufit shape
- Available colors: Black, White, Navy and Tan

Ultra Light Weight Ballistic Performance

Available with the Alpha Elite Ballistic Series, the Elite offers superb performance plus one of the lowest weights ever to be achieved in body armor at an unprecedented 0.79 pounds per square foot for a NIJ .06 Level IIIA model.

15

Front

VISION MALE

Vision® concealable body armor system integrates high performance ballistic materials with an ergonomic carrier construction, that is designed for around-theclock comfort. Featuring Outlast® Smart Fabric technology inner lining and our exclusive Self Suspending Ballistic System, the Vision® carrier continuously helps keep you cool, dry and comfortable.

- Self Suspending Ballistic System[™] (SSBS) provides optimal protective coverage
- Outlast[®] Smart Fabric technology inner material helps keep you cool and dry
- ThorShield™ sleeve electroshock weapon protection (optional)
- Aegis[™] antimicrobial protective properties resists growth of bacteria, mold and mildew
- Durable Water Repellent (DWR) micro-fiber
- Removable 2"x12" waist straps provide 8-point adjustability - Optional 4"x12" straps available
- Removable internal cummerbund stabilizes rear ballistic panel and helps prevent riding up when sitting
- Top loading, low profile plate pockets in the front and back accommodates 5"x8" Trauma inserts as well as 6"x 8", 7"x 9" or 8"x10" SPEED Plates, depending on the size of the carrier.
- · Mesh shirt tail construction or optional no tail
- VISION[®] concealable ballistic panels fit into **Crossover Carriers**
- Inner zipper for enhance concealability
- Available in MC shape

Available with optional

Available colors: Black, White, Navy & Tan

With DryRun™ Technology

Hi-Lite concealable carriers feature high performance comfort fabrics called DryRun®, which utilizes Sorbtek® permanent moisture management and environmentally safe A.M.Y® antimicrobial yarns. Through its Catch/Move/Release technology, DryRun® provides up to 6 times more moisture movement capacity than standard nylon, polyester and other moisture wicking fabrics. Less bacteria also means less odor through A.M.Y.®, which permanently inhibits the growth of odor causing bacteria on fabrics.

CROSSOVER BODY ARMOR

Point Blank's Crossover Carriers ... offer the ultimate fusion of comfort and around-the-clock performance. Combining the ergonomic design of a concealable carrier with the functionality of a load-bearing vest, Crossover carriers provide the best combination of form, fit, and versatility. Ideally suited for daily wear in any environment, these multi-functional carriers allow for rapid insertion of Point Blank ballistic panels. In minutes, the officer has ballistic protection in a lightweight, exceptionally durable carrier that can be easily adapted for equipment-carrying assignments.

BODYARMOR **≡**VENT[™]

BODYARMORVENT™ improves the daily comfort and operational effectiveness of law enforcement professionals. Featuring EVAP™ Technology, this highly effective system delivers continuous ventilation of body heat and accelerated evaporation of sweat, dropping body armor surface temperatures by as much as 23%. BODYARMORVENT™ is available as a Retrofit Kit consisting of 2 BODYARMORVENT™ panels, 1 inflation bulb and adhesive hook tape. Simply add BODYARMORVENT™ to any of Point Blank's Crossover Carriers and experience true evaporative cooling.

Thorshield™

While body armor saves lives and less-lethal devices such as electric stun guns prevent some fatal encounters, officers remain exposed if their body armor does not include ThorShieldTM. ThorShieldTM is a highly conductive, specialized fabric that is placed inside of a carrier. It ensures the electric current discharged from an electro shock weapon flows through the fabric rather than the body.

Durable, lightweight and exceptionally flexible, ThorShield™ is available in Point Blank body armor products.

Self-Suspending Ballistic System™ (SSBS)

This low profile ballistic suspension system features stretch shoulder straps which directly connects to the front and back ballistic panels, ensuring firm placement inside the carrier. By keeping the ballistics completely suspended, this highly effective strapping feature prevents the ballistic panels from rolling, sagging and bunching. It also helps maintain the original shape and coverage of the ballistic panels throughout the life of the vest.

Load Bearing Capability

Point Blank's Crossover Carriers feature heavy-duty, nylon stitched, load bearing webbing which provides quick and secure attachment of various MOLLE compatible pouches and accessories – in just about any location on the vest. This provides convenient customization according to your individual requirements, while giving you the opportunity to utilize other magazine pouches and issue gear. Integrated front and back pockets also accommodate hard armor plates so that you can immediately upgrade your protection.

STANDARD ODC

Combining the ergonomic design of a concealable carrier with the functionality of a load-bearing vest, the **Standard ODC** carrier provides the best combination of protection, adaptability, and versatility. Ideally suited for daily wear in any environment, the Standard ODC Carrier includes several new design features which make it the ideal choice for equipment carrying assignments.

PointBlankEnterprises.com

1-800-413-5155

Point Blank's full-line of mission adaptable Tactical Body Armor Systems are exclusively designed to meet the demanding needs of high-risk tactical teams. Each vest features a fully-integrated modular design that offers instant adaptability, time-tested reliability and the most technologically advanced ballistic systems available today. More SWAT officers trust Point Blank's tactical vests because when it comes to responding to dangerous missions, they know there's no compromise when it comes to total protection.

POINT BLANK **Tactical Body Armor**

B O D Y A R M O R ≡ V E N T

BODYARMORVENT™ improves the daily comfort and operational effectiveness of law enforcement professionals. Featuring EVAP™ Technology, this highly effective system delivers continuous ventilation of body heat and accelerated evaporation of sweat, dropping body armor surface temperatures by as much as 23%. BODYARMORVENT™ is available as a Retrofit Kit consisting of:

- 2 BODYARMORVENT™ panels
- 1 inflation bulb and adhesive hook tape

Simply add BODYARMORVENT™ to any of Point Blank's Tactical Carriers and experience true evaporative cooling.

Self-Suspending Ballistic System (SSBS)

This low profile ballistic suspension system features stretch shoulder straps which directly connects to the front and back ballistic panels, ensuring firm placement inside the carrier. By keeping the ballistics completely suspended, this highly effective strapping feature prevents the ballistic panels from rolling, sagging and bunching. It also helps maintain the original shape and coverage of the ballistic panels throughout the life of the vest.

MOLLE Compatible Webbing System

Point Blank's tactical vests feature heavy-duty, nylon stitched, load bearing webbing which provides quick and secure attachment of various MOLLE compatible pouches and accessories – in just about any location on the vest. This interchangeable system offers convenient customization according to your individual requirements, while giving you the opportunity to utilize other magazine pouches and issue gear.

Armor Protection Enhancement System

Point Blank's tactical vests are available with Level IIIA removable biceps, throat, collar and retractable groin protection which are essential in high risk situations. Designed for the active assaulter, the ballistic groin protector has a quick access pull-down feature and provides better range of motion. The biceps protector provides enhanced protection to the entire upper arm and shoulder area while accommodating trauma insert plates for additional protection.

All models, data and specifications are subject to modification by manufacturer without notice.

BRIEFCASE BALLISTIC SHIELD

With Point Blank precision, the Executive Ballistic Briefcase instantly converts from a lightweight, discreet briefcase to a fold-out ballistic shield with additional "special threats" protection (by inserting SPEED plates in the plate pockets). Within a matter of seconds, this convertible product can provide instant protective coverage against fragmentation and bullets. Ideally suited for dignitary protection details, private security and other high threat environments, the Point Blank Executive Ballistic Briefcase goes beyond traditional ballistic blankets by offering instant adaptability with maximum functionality in one, easy to deploy system.

Features:

- Highly durable nylon construction
- Two front plate pockets for 10" x 12" SPEED Plates
- Ergonomic rubberized molded handle
- Top flap to provide access to removable ballistic panels
- Concealed pull tab at the bottom of the bag for easy shield deployment
- Three retractable ballistic inserts
- Reinforced, triple handle straps for easy shield carry

Sizes:

- Folded 20" x 13.5"
- Unfolded 20" x 40"

Revolutionizing the way shields are used, the **GoShield** fulfills a gap that ard shields cannot match. Lightweight and exceptionally durable, this hands-free shield includes an ambidextrous quick release, adjustable

padded sling, hard armor plate pockets to allow for protection against rifle bullets, and other key features. All this and it can be rolled up and secured to itself ready for quick deployment.

Features:

- 1000 denier Cordura® outershell
- Total 40 inches in length
- Soft ballistic panels allow shield to unroll and provide instant protection (Separate storage bag included)
- Upper flap unrolls and suspends from vehicle door, boat rail, or support for breaching
- Front plate pocket for use with 10" x 12" stand alone certified hard armor plates in Level III or IV (Hard armor plate not included)
- Easy access long pockets for housing of rods
- Rigid rods provide framing reinforcement of shield
- Return-to-Center mechanism for maintaining upper rod placement when shooting hands-free
- Elastic tension for long rod pockets for securing rods in an active environment
- Rigid rubber upper handle for maintaining grip integrity
- Lower strap handle allows for two handle application
- Multiple D-rings and fasteners to attach the sling
- · Sling permits hands-free shooting with pistol
- Several points of attachment for slings enables cross-point or backpack style carry
- MOLLE Compatible webbing allows for adjustments of slings and shield height
- Folding positions to 30" or 25" allows for use in confined spaces
- Bottom loading flap for ballistic panel insertion
- Optional extra shoulder strap

Tandem Model

Color Available: Black

BALLISTIC BLANKET

Point Blank Body Armor's Ballistic Blankets are manufactured from high-strength, lightweight ballistic fabrics which are designed to highly provide a protective barrier against (Level IIIA) ammunition.

Features:

- Abrasion and water resistant
- 6 Heavy-duty, nylon carry handles

Sizes:

- 32"x72" | 36"x72" | 48"x72"
- Special sizes available upon request

CORRECTIONS CARRIERS

Our advanced body armor systems are specifically designed to help protect Corrections officers against spikes, shanks and other potentially lethal weapons typically found in corrections facilities. In response to the ever volatile conditions and unique threats Corrections professionals face each day, our body armor systems provide the superior puncture and slash resistant protection needed for optimal performance. Tested and certified by NIJ, our body armor systems provide exceptional torso, bicep, neck and groin protection against ice picks and other sharp edged, pointed weapons. We offer high performance stab packages in (Spike 1, 2 or 3), optional Edge Weapon Level III protection, as well as combo packages that offer ballistic and spike protection.

PROTECTION AGAINST **STAB THREATS**

Body armor that is ballistic resistant does not necessarily make it stab or puncture resistant (and vice versa). Sharp edged and hand made instruments with pointed tips such as spikes, awls or shanks generally do not need to tear the fabric to penetrate – it merely moves the fibers aside. Point Blank utilizes a combination of super fine, ultra-dense materials, which prevent pointed objects from spreading or moving the individual yarns to stop penetration/puncture.

Corrections and Riot Control

NIJ 0115.00 Standard for Stab Resistance

The NII rates body armor on resistance to hand-delivered stab threats - the NIJ 0115.00 Standard. Maximum penetration of 0.28"/7mm is allowed as serious injury is extremely unlikely with such a shallow wound. Also an "Over-test" is applied, to push the breaking point of the armor, where 0.79" / 20mm of penetration is allowed. Ice-pick or improvised "Spike" weapons testing is regularly conducted by Point Blank through its independent laboratories.

A.C.C.S.

Advanced Crowd Control Suit

Features:

- One size fits most adjustable extremity panels
- Body side Spacer mesh
- Laminated outer material
- Impact polymer shell
- Adjustable straps with two attachment options:
 - o G-Hook
 - o Synch through
- Arms and legs use an adjustable daisy chain elastic strap, allowing each component to adjust to the user
- Thigh panels can be removed from the daisy chain to allow thigh holsters and drop legs
- Belt with hip pads come with set, but can be replaced with Duty, Gun, Instructor or Riggers belts
- Forearm to elbow and shin to knee have an expanding hard connection which allows the elbow and the knee to stay in the correct spot while kneeling or bending the arm
- Front and back have 2" x 7" I.D. Panels
- Front has a 2" x 2" Rank Patch
- Back has an A Frame drag handle
- Hand protection fits securely to the wrist making sure they don't come off during struggles and allows other gloves to be worn with
- Front, back, forearm and thigh can take panels
- Stiffened belt to support hip pads, drop legs, and thigh protection (Can be substituted for pistol or gun belt)
- Hand protection can be used with additional glove protection (not included)
- Expanding chain joints to allow panels to stay in proper location during movement (IP Pending)

Corrections and Riot Control

ENGINEERED TO PROVIDE MAXIMUM **BLUNT FORCE PROTECTION**

Laminated outer material Shoulder Protection

Front and back have 2" x 7" I.D. Panels

Front has a 2" x 2" Rank Patch

Front, back, forearm and thigh can take panels

Optional (Sold separately) ballistic and/or stab panels for Front, Back, Thigh and Forearm

Forearm to elbow and shin to knee have an expanding hard connection which allows the elbow and the knee to stay in the correct spot while kneeling or bending the arm

Hand protection can be used with additional glove protection (not included)

Belt with hip pads come with set, but can be replaced with Duty, Gun, Instructor or Riggers belts

CELL EXTRACTION VEST

Engineered to provide maximum blunt force trauma protection, this high performance tactical vest also offers an unprecedented level of maneuverability, functionality and performance. Exceptionally lightweight and highly durable in construction, the Cell Extraction Suit answers the needs and wants of corrections professionals by providing superior protective coverage for the neck, torso, biceps and groin, while offering optimum versatility in fit.

Features:

- Side-opening design allows instant donning and doffing
- One-piece collar, shoulder and bicep protection system
- Removable split collar design improves interface with multiple styles of helmets
- High density, foam padding for shock absorption
- Streamlined shape and slick carrier surface with or without MOLLE interference
- Adjustable side-wing closure system provides optimum coverage and fit
- Multifaceted shoulder strapping system offers enhanced adjustability
- Low profile front and back pockets to accommodate blade plates
- Retractable groin protector with integrated thigh strapping system provides secure placement
- 3M Scothlite TM reflective tape positioned in the front and back of the vest for high visibility
- Sturdy 1000 denier Cordura® outershell construction resists tears and punctures
- Shoulder pockets accepts 5" x 8" protection

THRUSTGUARD

Thrustguard's Stab Spike/Blade Class Level 3 Body Armor System exceeds the stab resistance requirements of NIJ Standard 0115.00 with zero penetrations during laboratory testing. Designed to provide maximum blunt trauma, stab and edged weapon protection, this high performance vest offers Corrections Officers an unprecedented level of security.

Features:

- Adjustable side opening design
- Enhanced blunt trauma protection in collar and
- Thrust guard panels are removable from outershell
- Complete front, back and side stab protection
- Optional groin protector

MAXIMUM BLUNTTRAUMA, STAB AND EDGE PROTECTION

EXCEEDS NIJ STAB RESISTANCE REQUIREMENTS

The Thrust Guard features an adjustable iently located at the front of the vest

Front

Corrections and Riot Control

SVII CORRECTIONS

Engineered to provide maximum blunt trauma protection, this high performance tactical vest offers an unprecedented level of security. The SVII Corrections Body Armor System answers the needs and wants of corrections professionals by providing superior protective coverage, extreme versatility in fit and more customized features than any other corrections vest on the market.

MAXIMUM BLUNT TRAUMA PROTECTION

Features:

- Side-opening design allows instant donning and doffing
- Multifaceted shoulder strapping system offers optimal adjustability for multi-size capability and interior fasteners for improved weight distribution
- Removable throat protector is ergonomically designed to fit comfortably around chin area (optional)
- Removable split collar design provides greater comfort and improves interface with multiple style of helmets (optional)
- Biceps protector provides enhanced protection to the entire upper arm and shoulder area (optional)
- Exclusive bicep plate pocket design accommodates 5" x 8" SPEED or Blade Plates
- Side closure plate pocket design accommodates 6" x 8" stab plates

Additional Features:

- Front and back stab panels are NIJ certified 0115.00 Spike Level 3
- Stab panel suspension system ensures protection by preventing panels from sagging and rolling inside the carrier

Corrections and Riot Control

OPERATOR GEN II CORRECTIONS

Streamlined and highly effective, the Operator Gen II blends the functionality of a tactical vest with a simple carrier construction that's geared for high performance. Ideal for Corrections officers who need load-carrying capabilities with the versatility to adapt to any operation, the Operator Gen II will hold up to the toughest demands while offering superior protection.

Features:

- Available with NIJ-Standard-0101.06 Level IIIA ballistic system
- Exceptionally strong and durable 500 denier Cordura® outershell construction
- Carrier interior fabric constructed of Rashel nylon mesh
- Shoulder cut allows proper stock weld
- Low profile protective coverage
- Maximum MOLLE Compatible Load Bearing Webbing System
- Outer front and back pockets accommodates hard armor plates, 8" x 10 or 10" x 12" (size dependent on carrier)
- Back to front adjustable shoulder closure with VELCRO® Brand Fasteners on front with
 1" webbing pull tab, and buckle on the back
- Outer front flap with VELCRO® Brand Fastener closure to secure outer cummerbund with kangaroo pouch
- Internal adjustable 4" elastic cummerbund with adjustable 4" x 4" closure
- Removable and adjustable external cummerbund with webbing handle for easy adjustment
- Easy access ballistic panel and plate removal
- Quick release system for rapid removal of carrier
- Ambidextrous microphone use capability with
 1" webbing on front of both shoulders
- Reinforced "Man-Down" drag strap on back
- Custom agency ID Placards
- Available colors: Black, Coyote, Multi-cam, Ranger Green, OD Green, and Wolf Grey

OPTIONS

- Ballistic collar, throat, biceps, and groin protection
- Hard Armor Plates
- BODYARMORVENT® Retrofit Kit
- ThorShield® Electroshock Weapon Protection

RIOT SHIELDS

WARRIOR SHIELD Police, Sheriff, National Guard, University Police, Riot Squad, or Jail personnel.

The ergonomic shape of the Warrior Shield makes it ideally suited for left or right hand use. The handle and breakaway strap are dielectric to prevent electrical pass through while the wide nylon arm strap is easily adjustable while in use. Extremely durable and easy to operate, the Warrior Shield has superior optical quality for the most extreme conditions.

Product Details

- Shield Material: Polycarbonate
- Handles Material: Polymer Alloy with steel inserts Thickness is .25 inches
- Weight: 4 lbs.
- 24" round with a formed radius

Corrections and Riot Control

- · Color: Clear

ARREST SHIELD Designed for cell extraction and capture applications in close quarters.

The Arrest Shield is a hand held capture shield with ergonomic features. The strong double handles allow a firm grip under various conditions. The handles are dielectric to prevent electrical pass through. This product is unique as the design allows two people to grip with both hands on each handle, when extra holding power is needed. The shield has superior optical quality and workmanship.

Product Details

- Shield Material: Polycarbonate
- Handles Material: Polymer Alloy with steel inserts
- Two sizes: 20"x36" and 24"x48" with a formed radius
- Spec: USA Departmental Specification
- Thickness is 0.25 inches
- · Color: Clear

MEDIATOR SHIELD

Police. Sheriff. National Guard. University Police, Riot Squad, or Jail personnel.

The Mediator is a hand held body shield with ergonomic features. The ergonomic handle allows two handed use for extreme circumstances. The handle and breakaway strap are dielectric to prevent electrical pass through and can be reversed for left or right hand use. The wide nylon arm strap is easily adjustable while in use. The shield has superior optical quality and workmanship

Product Details

- Shield Material: Polycarbonate
- Handles Material: Polymer Alloy with steel inserts
- Weight: 8.5 lbs.
- Two sizes: 20"x36" and 24"x48" with a formed radius

- Thickness is 0.25 inches
- Color: Clear
- Options: Machete Edge Protector Steel lined polymer lip that protects the entire edge of the shield from edged weapons, or hard object strikes.

Corrections and Riot Control

ARCH HELMET

Advanced Riot Control Helmet

Features:

- Material: Acrylonitrile butadiene styrene (ABS) plastic
- Colors: Black
- Polycarbonate with rubber seal (spill proof)
- Interior Liner: removable foam liner
- NIJ complaint quick release buckles
- Detachable .150" (3.8mm) thick face shield with liquid seal prevents liquid from seeping into officer's eyes
- Molded lip on top edge of face shield to prevent shield from closing over integral visor and striking the wearer's face
- Powder coated aluminum Face Guard for maximum strength and safety
- Snap-on nape pad with Kydex® penetration shield, shock absorbent foam pads and chemical-resistant black
- Cordura® cover

Retention System

- 4-point attachment system with supportive neck pad allows for additional comfort and helps stabilize the helmet with the face shield in all positions
- Easily adjusted for a comfortable fit
- Picatinny attachment on both sides allows for placement of light and body camera leaving hands free for weapons (Light and Camera not included)
- Nape curtain attachment

Performance

 Meet or exceeds NIJ Standard for Blunt Trauma for Riot Helmets - NLJ-STD-0104.02

ARCH Accessories

Face Shields - Standard, Grid and Gas Mask

*The U.S. Department of Transportation Standard, D.O.T. FMVSS218, establishes performance requirements for helmets designed for use by motorcyclists. This helmet is not intended for vehicular use.

TACTICAL ACCESSORIES

Enhance operational readiness and mission capabilities with our cutting edge tactical equipment. We deliver superior products that enhance the safety and performance of both domestic and international law enforcement and corrections professionals.

POINT BLANK Tactical Accessories

Hard Armor Plates

We offer a variety of hard armor plates ranging in construction from ceramic/aramid to ultra light-weight polyethylene. Offered in NIJ Level III, IV or Level III/IV In-Conjunction with Level IIIA, these plates provide superior protection from high velocity rounds. Available in different sizes, shapes and curvature options, our hard armor plates can meet the needs of any mission in the most extreme operating environments.

Helmets

Constructed of high performing and lightweight aramid fibers in a composite matrix, our helmets provide solid protection against handgun bullets (9mm and .44 Magnum) and fragments. Our highly innovative helmet designs incorporate the latest bullet-resistant safety standards, customized sizing, ergonomic comfort, and technical functionality, developed specifically for law enforcement and military operations.

Ballistic Shields

Ground breaking in design and unparalleled in functionality, maneuverability and overall performance, Point Blank offers a full line of ballistic shields available in different sizes, shapes and threat levels. Specially designed to provide greater agility for handgun deployment, the Aspis, Bellator, Phalanx and Trifecta shields provide multiple design features and provide exceptional protection against a variety of special threats.

Special Ops Bunker (SOB)

SOB Defense Systems fill the gap between body armor and armored vehicles. Situations often arise where operators need the confidence and security of head-to-toe ballistic coverage. Armored vehicles provide excellent coverage, but they cannot be taken through doorways, down hallways, or into elevators. SOB Defense systems incorporate an optimal balance of protection, mobility, and versatility for real world operations. It provides the highest level of protection possible while allowing for mobility, agility, and overall versatility in a variety of circumstances. SOB Defense Systems offer protection when and where it is needed, so that Officers can return home safely after every operation.

Engineered to protect against high energy bullets, our SPEED Plate Plus is ultra-light, multi-hit protective inserts that consistently delivers exceptional ballistic performance against a wide-range of "special threats" bullets. As a Stand-Alone plate, it provides additional stopping power along with a high degree of trauma reduction, equaling unparalleled ballistic protection.

Tactical Accessories

- Designed specifically with the patrol officer and first responder in mind to provide advanced rifle threat protection with their existing vest system.
- Stand -Alone Multi-Hit rifle threat protection in an ultra thin, light-weight package.
- Designed specifically to defeat the most common rifle threats found on the street today (AR15/AK47)
- Multiple shapes and sizes to easily upgrade your current trauma plate protection.
- The Speed Plate PLUS takes armor protection to the next level.

POINT BLANK Tactical Accessories / Helmets

PTH HELMET

Manufactured to meet stringent quality standards, the PARACLETE® Tactical helmet delivers the level of ballistic and impact head protection demanded for tough tactical operations. The helmet is made of aramid materials and built in the ACH shape. Helmets are available in a full range of cuts (full, mid and high), sizes (small to x-large) and colors (black, foliage green, olive green and tan). They come standard with 0.75" liner pads and 4-point harness with nape pad.

PTH-IIIA Specifications:

- Significantly exceeds 2200 ft/s (670 m/s), 1.1 g (17 gr) FSP
- Stops NIJ IIIA level threats (9mm and 44 mag) (NIJ 0106.01)
- Meets U.S Army Standard for impact protection (CO/PD-05-04)

**Weight:

- Full Cut System 1465 grams (Size Medium)
- High Cut System 1355 grams (Size Medium)

Shell Geometry and Construction:

- Low-profile design
- Designed for comfort
- Compatible with standard face shields, NVGs,
- Chem/Bio Masks and communication devices
- Offers unsurpassed impact protection and ballistic-rated hardware
- Tested for ballistic performance from -40°F to 158°F (-40°C to 70°C)
- 3 cut styles provide variable coverage options

Suspension / Liner System:

- Provides superior comfort by distributing the helmet's weight evenly
- Meets all the chemical-resistant tests required by the U.S. Army
- Lightweight, sweat-wicking material resists moisture buildup

Retention System:

- 4-point attachment system with supportive neck pad
- Easily adjusted for a comfortable fit

COLORS

- Tan
- Foliage Green
- Black
- Olive Green

For PTH IIIA Helmet

Tactical Accessories

7 Pad Liner System Pad Liner System 0.5" Thickness

Movable sweat-wicking comfort pads provide impact protection and superior comfort by distributing the helmet's weight evenly. The 7-Pad Liner System includes 1 circular crown pad, 2 trapezoidal pads, and 4 oblong pads which are available in various thicknesses.

Retention System

Easily adjustable 4-point attachment system provides optimal retention and fit. Retention System includes nape pad, adjustable tensioners on straps, chin cut and buckle. The system accommodates small, medium, large and extra-large helmets. Available in Black, Olive Green, Foliage Green and Tan

Helmet Bag

Helmet storage bag composed of durable, water resistant fabric with drawstring opening and a personalized name tag.

Modular Suspension System

The Modular Suspension System (MSS) is comprised of an impact liner, dial fit band, comfort pad system and retention system. The impact liner is made of low profile impact material and exceeds U.S. Army ACH impact standard. An adjustable crown net allows for sweat wicking and comfort. It suspends the helmet shell on the wearer's head, meaning the impact liner does not come into contact with the head, providing a free flow of air for cooling benefits. The system accommodates small, medium, large and extra-large helmets. Available in Black and Tan.

HELMET ACCESSORIES

For PTH IIIA Helmet

Precision Basic, Full, Mid, and High Cut Helmet Cover

Full cut helmet cover includes elastic drawstring and 4 hook and loop tabs that allow the cover to stay securely in place on helmet. The system accommodates small, medium, large and extra large helmets.

Available in Black, Multi-cam and ACU.

Precision Fit Premium Helmet Cover

Precision Fit Premium Helmet Cover for Full and High Cut helmets includes elastic drawstring and 4 hook and loop tabs that allow the cover to stay securely in place on helmet, elastic accessory loops and hook and loop for attaching patches, counter weights, mesh covering for increased camouflaging and cable runs to reduce snagging. The system accommodates small, medium, large and extra-large helmets.

Available in Black, Multi-cam and ACU.

Precision Fit Enhanced Helmet Cover

Precision Fit Enhanced Helmet Cover for Full Cut helmets includes elastic drawstring and 4 hook and loop tabs that allow the cover to stay securely in place on helmet, elastic accessory loops and hook and loop for attaching patches, counterweights, etc.

The system accommodates small, medium, large and extra-large helmets.

Available in Black, Multi-cam and ACU.

1-800-413-5155

HOPLITE IIIA

Designed for immediate active shooter response, this exceptionally lightweight shield provides the ultimate combination of high performance protection, optimal functionality and usability.

Features:

- Tested to Federal Standard NIJ-STD-0108.01 Level IIIA
- Shield construction available in flat or curved shape
- Designed for maximum defensive capability
- Durable Polyurea coating
- Unique Forearm Strap attachment system
- Weight of the shield system w/ optional features does not exceed 19 lbs.
- Shield body thickness is .3"
- Reinforced Bolt system for added protection

Options:

- With or without viewport
- LED light with strobe mode
- 1200 Lumens
- Transport bag
- Viewport Constructed of 1" thick polycarbonate that provides a viewable area while maintaining Level IIIA protection
- Flat viewport has a viewable area of 8" x 2.75"
- Curved viewport has a viewable area of 12" x 3"

Flat

BELLATOR IIIA+

The Bellator Shield is specially designed to meet the demanding needs of high-risk tactical teams Providing greater vertical protective coverage and a

dynamic shape for long gun deployment, the Bellator offers the perfect combination of protection and performance.

Features:

- Level IIIA+ protection
- Federal Standard NIJ-STD
- Accurate long-gun deployment
- Ballistic Material Hybrid composite
- Polyurea coating for enhanced durability and longevity
- 24"x 36" with viewport weighs only 14.40 lbs.
- Lightweight 24"x40" with viewport weighs only 16.10 lbs.
- Mitigates ricochets when deaployed on the ground
- Unique Hook and Loop forearm strap attachment system
- Thick high density foam pad 11"x7"x 1.5"
- Silhouette shape provides firearms deployment on both shoulders
- Better peripheral view
- Stationary handle

Special Threats Rounds Tested:

- 9mm Fiocchi, 115-grain FMJ projectiles.
- 9mm, 124-grain full metal jacketed (FMJ) projectiles.
- •.357 SIG 115-grain jacketed hollow point (JHP) projectiles. •.357 SIG 125-grain gold dot hollow
- point (GDHP) projectiles. • 44-mag., 240-grain semi-wadcutter
- gas checked (SWCGC) projectiles • 9mm +P+, 127-grain supreme expansion technology (SXT) projectiles.
- 5.7 x 28mm 27-grain SS195 lead free hollow point (LFHP) projectiles.
- 5.7 x 28mm 40-grain Hornady V-Max (Blue Tip) projectiles.
- 7.62 x 25mm, 95-grain TOKAREV FMJ projectiles.
- •.40 cal., 95-grain Aguila projectiles

Options:

- With or without viewport
- LED light with strobe mode
- 1200 Lumens
- Transport Bag

PHALANX IIIA+

The Phalanx is considered the most agile Level IIIA+ shield for hand gun and long gun deployment. A wide, trapezoid shaped viewport provides excellent viewing capabilities while the mounted platform on each side allows the operator to position their weapon for optimum firing position.

Tactical Accessories / Shields

Features:

- Level IIIA+ protection
- 100% boltless system
- More functional view port
- Polyurea coating for enhanced durability and Iongevity
- Lightweight (26" x 36" with viewport) is only 20 lbs.
- Best agile performing shield for handgun and rifle deployment
- Wider ballistic protection at top
- V-shape added strength to the entire center length of the shield
- Weapon mount platform on both sides
- Better view at 12 o'clock and conversely when held inverted 6 o'clock position
- Thick high density foam pad
- Mitigates ricochets and diverts away from center
- Unique Hook and Loop forearm strap attachment system
- Accurate handgun and long-gun deployment
- Stationary handle

Special Threats Rounds Tested:

- Level IIIA+ 44mag, 240-grain Semi- wadcutter Gas Checked (SWCGC) projectiles.
- 9mm, 124 grain Full Metal Jacketed (FMJ) projectiles.
- .357 SIG 115 grain Jacketed Hollow Point (JHP) projectiles.
- .357 SIG 125 grain Gold Dot Hollow Point (GDHP) projectiles.
- 9mm +P+, 127 grain Supreme Expansion Technology (SXT) projectiles.
- 5.72 x 28mm 40-grain Hornady V-Max (Blue Tip) projectiles.
- 5.7 x 28mm 27grain SS195 Lead free Hollow Point (LFHP) projectiles.
- •7.62 x 25-mm, 95grain TOKAREV FMJ projectiles.
- 9mm Fiocchi, 115 grain FMJ projectiles.
- .40 cal., 95 grain Aguila projectiles

Options:

- With or without viewport
- LED light with strobe (450 lumens)
- Transport Bag

Technical Specifications:

- Federal Standard NIJ-STD
- View port (Trapezoid Shape)
- · Ballistic material hybrid composite
- Must come w/ 3 components: Handle, foam pad, and forearm strap system

All models, data and specifications are subject to modification by manufacturer without notice

Paint Blank

PHALANX III

The Phalanx III provides level III protection. A wide, trapezoid shaped viewport provides excellent viewing capabilities while the mounted platform on each side allows the operator to position their weapon for optimum firing position.

Features:

- Rifle rated Level III Protection
- Components offered on the interior of the shield
- Stationary handle
- Thick high density foam pad
- Unique hook/loop fastener forearm strap attachment system
- Integrated Non-Ballistic weapon mount system
- Three positional shooting platforms

Technical Specifications:

- Federal Standard NIJ-STD-0108.01 Level III Compliant
- Ballistic Material Hybrid Composite
- Size is 20" x 36" (+/- ½")
- Weight with Viewport and light do not exceed 26 lbs.
- Viewport 3" x 9"
- LED 900 Lumens light system
- Shield thickness is 1" (+/- .1")

Rounds Tested:

- 7.62 x 51-mm, 149-grain M80 FMJ
- 7.62 x 39-mm, 123-grain PS ball

Options:

- With or without viewport
- LED light with strobe mode

ASPIS IIIA+

The ASPIS Shield is ideal for quick deployment in tight quarters. Exceptionally lightweight, this high performing Level IIIA+ shield delivers optimal protective coverage with enhanced maneuverability for left or right handed operators.

Features:

- Level IIIA+ protection
- Federal Standard NIJ-STD
- Accurate long-gun deployment
- Ballistic Material Hybrid composite
- Thick high density foam pad 7"x7"x 1.5"
- 20"x 30" with lights weighs only 15.75 lbs.
- 20"x30" without lights weighs only 14.00 lbs.
- 20"x30" without viewport weighs only 11.50 lbs.
- Mitigates ricochets when deployed on the ground • Unique Hook and Loop forearm strap attachment
- system
- Silhouette shape provides firearms deployment on both shoulders
- Polyurea coating for enhanced durability and longevity
- Better peripheral view
- Stationary handle

Technical Specifications:

- Federal Standard NIJ-STD
- Ballistic Material Hybrid composite
- Must come with 3 components: Handle, Foam Pad and Forearm strap system
- View Port (Trapezoid Shape)

Special Threats Rounds Tested:

Tactical Accessories / Shields

Options:

- With or without viewport
- LED light with strobe (450 lumens)
- Transport Bag

Exceptionally lightweight at only 17lbs, the ASPIS X Shield provides superior maneuverability for handgun and long gun deployment. Available in Level III protection, the ASPIS X delivers high performance protection and optimal functionality.

Features:

- Stationary handle
- Thick high density foam pad
- 3" x 9" Reinforced Viewport
- Weapon Mount System (WMS)
- Two shooting platforms for accurate handgun and long-gun deployment
- Lightweight (20" x 30" standard class) weighs only 17 lbs
- 3 important components offered on the interior of the shield
- Best agile performing shield for handgun deployment
- Unique Hook and Loop forearm strap attachment system

Special Threats Rounds Tested:

- 7.62 x 39-mm, 123-grain PS Ball
- 7.62 x 51mm 149gr M80

Front

ASPIS X GENII III

Exceptionally lightweight at only 17.9 lbs, the ASPIS X Gen II Shield provides superior maneuverability for handgun and long gun deployment. Available in Level III protection, the ASPIS X Gen II delivers high performance protection and optimal functionality.

Features:

- Level III protection
- Multi-Hit
- Federal Standard NIJ-STD
- Accurate long-gun deployment
- Ballistic Material Hybrid composite
- Polyurea coating for enhanced durability and longevity
- 20"x 30" Full System Weight = 17.9 LBS
- Mitigates ricochets when deployed on the ground
- Unique Hook and Loop forearm strap attachment system
- Thick high density foam pad 7"x7"x 1.5"
- Flat Design Lower Weapon Mount System
- Stationary handle

SOB™ SPECIAL OPS BUNKER

Collapsible Defense System

The SOB™ is the only personal defense system of it's kind, offering the ideal mix of ballistic protection and mobility. It is designed for easy transport and quick deployment. After all, armor is worthless if you can't take it with you.

Unlike hand-carry shields, the SOB™ offers full-body coverage against extreme ballistic threats. It is freestanding, allowing the operator to maintain use of both hands when necessary.

Our unique patented design allows the SOB™ to collapse into a single compact unit, small enough to fit in the trunk of a patrol car for transport or storage. When you need the SOB™ it can be fully deployed in less than 20 seconds!

Modular side panels can be attached when additional coverage is needed. Side panels can also function as hand-carry shields.

The SOB™ armor system is rigorously tested and certified to exceed NIJ Level IV requirements. Wheels, axles, and run-flat tires can also withstand multiple gunshots.

Ballistic Options

Side Panel (NIJ Level III+): 46 lbs (21 kg) Side Panel (NIJ Level III): 37 lbs (17 kg)

Tactical Accessories

SOB II™ SPECIAL OPS BUNKER

Collapsible Defense System

The SOB II[™] is an evolution of the legendary collapsible defense system pioneered by Special Ops Bunker. It is designed for efficient transport and quick deployment. After all, armor is worthless if you can't take it

Our unique patented design allows the SOB II™ to collapse into a single compact unit, small enough to fit in the trunk of a patrol car for transport or storage. When you need the SOB II™ it can be fully deployed in one minute or less. This makes the SOB II™ ideal for a broad range of tactical deployments.

The SOB II™ comes standard with modular side panels that can be quickly removed to function as hand-carry shields. The side panels swing back offering added protection on the sides, and also allows the SOB II™ to pass easily through a single doorway. When placed in the forward position the side panels offer a wider overall ballistic protection area.

The SOB™ armor system is rigorously tested and certified to exceed NIJ Level IV requirements. Wheels, axles, and run-flat tires can also withstand multiple gunshots.

Ballistic Options

NIJ Level III (7.62 NATO Ball M80 149 gr.) NIJ Level III+ (7.62x39mm MSC 123 gr, 5.56x45mm M855 62 gr.) NIJ Level IV (.30 CAL AP M2 7.62x63mm 166 gr.)

Total Armor Area

11 square feet without side panels 21 square feet with side panels

Dimensions

Deployed: 27" W x 36" D x 74" H With Side Panels (Narrow): 27" W x 36" D x 74" H With Side Panels (Extended): 42" W x 36" D x 74" H Stowed: 27" W x 36" D x 12" H Footprint (stowed horizontal): 27" x 36" Footprint (stowed vertical): 12" x 27"

Weight

Chassis (NIJ Level IV): 224 lbs (102 kg) Removeable Viewport (NIJ Level IV): 90 lbs (41 kg) Chassis + Viewport: 314 lbs (142 kg)

Side Panel (NIJ Level IV): 50 lbs (23 kg) Side Panel (NIJ Level III+): 40 lbs (18 kg) Side Panel (NIJ Level III): 29 lbs (13 kg)

SOB™ SENTRY

Mobile Defense System

The SOB® Sentry is a mobile defense system fixed in the upright position, designed for environments where there is no need to collapse the unit for transport or storage. It can be easily maneuvered into position using one hand. It is also freestanding, so once in position it does not burden the hands of the operator.

This model is available in two configurations, the SOB® Sentry Single and the SOB® Sentry double. The Sentry Single is designed to pass straight through a standard 3 foot door. The Sentry double is designed to pass through a standard 3 foot door from end to end.

The SOB® Sentry Single includes one redundant N.I.J. Level IIIA hand-carry shield (two in the Sentry double) that is stowed on the back of the unit and can be quickly deployed for independent use.

Common applications for the SOB® Sentry include security checkpoints, industrial security applications, courthouses, government buildings, and for security in larger facilities where storage space is abundant. It is used for a variety of applications including barricaded gunman situations, hostage negotiation and rescue operations, VIP relocation, first response to active shooters, and rescue operations.

Features

- Head-to-toe ballistic coverage
- One-hand maneuverability keeps the other hand free for weapon use
- \bullet Freestanding unit leaves both hands free once positioned
- \bullet Vision panel can be removed and stowed on the unit for transport and storage
- Wheels, axles, and run-flat tires can withstand multiple gunshots
- Several options available including gun ports, Picatinny™ rails, and lighting/video
- Designed to pass through a standard 3' door (91 cm) opening

Ballistic Options:

- N.I.J. Level IIIA (9mm FMJ 124 gr., .44 MAG SWcGc 240 gr.)
- N.I.J. Level III (7.62mm Ball M80 149 gr.)
- N.I.J. Level III+ (7.62 x 39mm MSc 123 gr, 5.56mm M855 62 gr.)
- N.I.J. Level IV (CAL. .30 AP M2 166 gr.)

SOB™ Sentry Single Dimensions:

- 31.5"W. x 32"d. x 75"H.
- Ballistic protection: 20"W. x 75"H.
- Weight (N.I.J. IIIA): 240 lbs (109 kg)
- Weight (N.I.J. III): 252 lbs (114 kg)
- Weight (N.I.J. III+): 276 lbs (125 kg)
- Weight (N.I.J. IV): 298 lbs (135 kg)

SOB™ Sentry Double Dimensions:

• 54"W. x 32"D. x 75"H.

1-800-413-5155

- Ballistic protection: 45"W. x 75"H.
- Weight (N.I.J. IIIA): 390 lbs (177 kg)
- Weight (N.I.J. III): 420 lbs (191 kg)
- Weight (N.I.J. III+): 500 lbs (227 kg)
- Weight (N.I.J. IV): 520 lbs (236 kg)

SOB II TAC WALL

Lightweight Modular Defense System

The SOB-TAC-WALL™ is a revolutionary concept in personal defense brought to you by Spec Ops Bunker. Designed for efficient transport and quick deployment, this highly versatile and modular system can be utilized in separate patrol vehicles for individual deployment or used as a system, when the team is operating together.

What makes the SOB-TAC-WALL™ incredibly scalable is that the individual shields can be used independently or linked together, side by side, to form one continuous freestanding ballistic wall. The system includes an adjustable, ambidextrous handle and optional harness system that attach using QD swivels. No additional hardware is necessary when linking the shields, so components are never lost or misplaced. When linked together, the system can be easily carried using the Crossbar hardware. All shields are identical, so there is no limit to the number of shields that can be linked together. This allows an agency the option to build the system as budget allows.

Options

- Harness system for vehicular integration
- Shoulder carry harness
- Crossbar carry system
- Gun ports
- SOB TAC-WALL[™] 56 has viewport option

SOB TAC-WALL™ 48 Features

Ballistic Options (NIJ 0108.01)

- Level III (7.62 NATO Ball M80 149 gr.)
- Level III+ (7.62x39mm MSC 123 gr, 5.56x45mm M855 62 gr.)

Total Armor Area

• 7.3 square feet per shield

Dimensions

- Single shield size: 22" W x 48" H
- Three shields linked: 60" W x 48" H

Weight

- Level III: 35 lbs per shield
- Level III+: 42 lbs per shield

SOB TAC-WALL™ 56 Features

Ballistic Options (NIJ 0108.01)

- Level III (7.62 NATO Ball M80 149 gr.)
- Level III+ (7.62x39mm MSC 123 gr, 5.56x45mm M855 62 gr.)

Total Armor Area

• 8.5 square feet per shield

Dimensions

- Single shield size: 22" W x 56" H
- Three shields linked: 60" W x 56" H

Weight

- Level III: 40 lbs per shield
- Level III+: 49 lbs per shield

- Can fit all X26 models

and flexibility.

PointBlankEnterprises.com

Point Blank's modular pouches include a patented attachment system that negates the need for clips, snaps,

plastic tie downs, and cordage. The attachment device is permanently affixed to the

equipment assembly, so it cannot be lost or otherwise separated from the pocket, pouch, or

holster. This system will not rust or become unserviceable even under the most extreme

environmental conditions and it maintains its flexibility in frigid climates. No other tactical modular attachment system in the world today can compare with its simplicity, durability,
